

## THAILAND SHOWS EXOTIC & INNOVATIVE ACTIVE INGREDIENTS AT COSMETIC360

**Paris, 16 October 2019** - Thailand Center of Excellence for Life Science (Public Organization) or TCELS has recently teamed up with 3 national research centers and a group of Thai raw materials producers to showcase exotic & innovative active ingredients at Cosmetic360, from 16<sup>th</sup> to 17<sup>th</sup> October 2019 in Paris.

*“Thailand is worldwide recognized for health and wellness industry, including spa and medical tourism. Each year, more than 30 million tourists come to Thailand and enjoy our services at affordable price. When combined with Thai hospitality, we are second to none in the health and wellness business,”* mentioned Dr. Sirasak Tepakum, TCELS Deputy CEO. *“Since Thailand is in the tropical zone, we have a lot of natural resources and large biodiversity. With our participation in Cosmetic360 this year, we would like to position ourselves as Biodiversity Hub of Asia and show Thai active ingredients of high quality with its efficacy to the World.”*

In 2019, TCELS reserved 3 booths at Cosmetic360 to showcase innovative active ingredients from Thailand in close collaboration with Thai Cosmetic Cluster, National Nanotechnology Center, University of Mahidol and University of Naraeuan. The display is evolved around the theme of **“Discover Thailand, Biodiversity Hub of Asia”** with active ingredients from Thailand by Thai manufacturers:

- Aspergillus/Rice ferment extract from Wabellas
- Purified Xantone from mangosteen peel from Quality Plus Esthetics International
- Organic colostrum from David Enterprise & Development
- Zengiber oil from Thai-China Flavor & Fragrance Industry
- Coffee Peel Extract, Curcumin Zinc Complex and Rice Stem Cell Extract from MYR Cosmetics Solution
- Bentonite from Clone Quality/Patapee Clay Mask

Ms. Lucksupha Prabhawat, Chairman of Thai Cosmetic Cluster (TCOS), shared her views that *“TCOS and TCELS are part of Global Cosmetic Clusters, the first international clusters network dedicated to innovation in cosmetics. It gathers 25 clusters of the entire cosmetic value chain (cosmetics, formulations, digital transition, raw materials, packaging, tests and analyses, finished products and distribution) at an international scale. We encourage Thai SMEs to foster its internalization through networking and collaborative project. Cosmetic360 is therefore a commercial and networking platform to Thai SMEs”*

Apart from the visibility offered by booth presence, Thai SMEs can join conference, B-to-B meetings and apply for Open Innovation Programme to meet French leading brands (Chanel, LVMH, L’Oreal, Nuxe,...) during the show. The delegation will also visit some laboratories, retail shops, and factories in France to know more about French beauty industry.
